

Australian Milking Merino®

Keri – Keri Sire W8107 (4T)

Top Sire : Keri-Keri W8107 (4T) ↑ →
 Photos taken before (with 4.5 months wool) & after shearing March 2005

Keri-Keri W8107 is the National Trait Leader in Merino Validation Project for 200 day body growth rate of progeny.
The EBV for this ram is +12kg which puts him in the top 1% of all Meat Sheep sires.

Keri-Keri W8107 is now 8 years old & has lived his life at Keri-Keri, surviving the 2002 / 2003 drought & harsh climatic conditions. Apart from when he is having semen collected, in the AI centre, he runs in the paddocks on the Hay plains with no supplementary feeding or shedding (as do all sheep on Keri- Keri). He was again joined with top stud ewes in 2006. Being such a great **plain bodied ram** Keri-Keri W8107 is continually & repetitively used by our clients to “straighten their sheep out”. He has the added bonus of also carrying the 4 teater gene.

Test Date	Micron	C.V.	C.F.
14.8.99	21.4	15.8	99.2
16.8.02	21.7	17.4	99.1
25.4.06	20.8	19.6	99.1

Son of W8107 : Keri-Keri 0670

Drought - 2003
